

The Charm of Colorful Steuben Glass

❧ STEUBEN GLASS ❧

*A Refreshing Touch for
Every Room in the Home*

COLLECTORS of fine things often lament the passing of the old manner of artistry that personal love of craft which began with wondrous prehistoric ivory carvings, and ended with an Age of Machines.

But though worm-scored wood, and assiduous finishing may yield nearly the fine patina of an original oak piece or dropped-in linen threads simulate antique usage in a modern brocade there is no substitute for the age-old art of blowing fine glass by hand.

The pity of it is that so few authentic pieces of historic glass have come down to us. Fragility is a poor barrier to the ravages of time. But it is fortunate that at Steuben Furnaces the craft practices are identical with the best historic periods. A seething pot of molten glass, a blasting-hot furnace, a slender blow tube these are the implements.

The rest is skill and a love of beauty and a striving for perfection that is as honest in its purpose as the crystalline brilliance of Steuben Glass itself.

to complement the finest blooms

THERE is a happy affinity between fresh, colorful blossoms and hand-blown Steuben Glass. Crispness and grace brilliance and harmony the touch of Nature blended with the art of man.

From the time of the Old Kingdom of Egypt to the Renaissance of Europe, the decorative value of flowers has influenced art and culture. Steuben designs adhere to the best traditions of history. Contours, colors and textures are carefully studied to enhance the beauty of flowers.

And there is great variety in forms from stately amphorae, gorgeously engraved, to simple pieces that are loveliest with their burden of garden blossoms.

Flower vases in transparent colors, \$3 and more; in Aurene blues and golds, \$6 and up.

❧ *The art of combining light and
color in your decorative scheme* ❧

A most striking feature of the advancing taste for good interiors is appreciation of color harmony and contrast. Utter dullness and glaring colors are passing. Carefully studied tone and texture schemes give our homes an interest and livability.

Glass from Steuben, in purity of form and glory of color meets all decorative demands. For sharp spots simple Steuben shapes in translucent Lemons, Plums, Jade Greens and Reds, brilliant surfaced, or deeply etched. For lightness transparent pieces in the rarest tints of sapphire, green and amber.

Vases, transparent colors, \$6 and up; sculptured or engraved glass, \$10 and higher; Aurene blues and golds, \$12 and more.
